

VIG BondMaxx Total Return Bond Investment Fund

P series PLN MONTHLY report - 2023 JUNE (made on: 06/30/2023)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.

The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an "investment clock" approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Last month, the FOMC paused its rate hikes while sent a hawkish message to the market. The median FOMC rate projection for this year increased by 50bp. The ECB hiked by 25bp and signalled more tightening later on amid upward revisions to the inflation forecasts. In the UK, employment and wage data surprised to the upside. In China, the PBoC cut rates in response to the weakening pace of recovery. The BoE and the Norges Bank hiked by 50bp each, while the SNB raised its key rate by 25bp. Curves continued to flatten in the US and in Europe, where the 2Y vs. 10Y Bund spread fell below -70bp. In the Eurozone, headline CPI inflation dropped to 5.5% YoY in June from 6.1% YoY, while the core figure was up to 5.4% YoY from 5.3% YoY. In the US, Q1 2023 GDP growth was revised up to 2% from 1.3% in annualized terms. Equity markets have largely trended sideways later in the month, torn between hawkish central banks and hopes for a solid earnings season. The latter should also bring new impetus to credit spreads, which have lacked direction. Meanwhile, better than-expected US economic data weighed on government bonds and prompted more curve flattening.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 3.9%
ISIN code:	HU0000712401
Start:	08/12/2013
Currency:	PLN
Net Asset Value of the whole Fund:	16,675,931,798 HUF
Net Asset Value of P series:	13,716,161 PLN
Net Asset Value per unit:	1.084787 PLN
