

VIG Emerging Europe Bond Investment Fund

B series HUF MONTHLY report - 2023 JUNE (made on: 06/30/2023)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

Last month, the FOMC paused its rate hikes while sent a hawkish message to the market. The median FOMC rate projection for this year increased by 50bp. The ECB hiked by 25bp and signalled more tightening later on amid upward revisions to the inflation forecasts. In the UK, employment and wage data surprised to the upside. In China, the PBoC cut rates in response to the weakening pace of recovery. The BoE and the Norges Bank hiked by 50bp each, while the SNB raised its key rate by 25bp. Curves continued to flatten in the US and in Europe, where the 2Y vs. 10Y Bund spread fell below -70bp. In the Eurozone, headline CPI inflation dropped to 5.5% YoY in June from 6.1% YoY, while the core figure was up to 5.4% YoY from 5.3% YoY. In the US, Q1 2023 GDP growth was revised up to 2% from 1.3% in annualized terms. Equity markets have largely trended sideways later in the month, torn between hawkish central banks and hopes for a solid earnings season. The latter should also bring new impetus to credit spreads, which have lacked direction. Meanwhile, better than-expected US economic data weighed on government bonds and prompted more curve flattening.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000724240
Start:	12/29/2020
Currency:	HUF
