

VIG Emerging Market ESG Equity Investment Fund

A series HUF MONTHLY report - 2023 JUNE (made on: 06/30/2023)

INVESTMENT POLICY OF THE FUND

The aim of the fund is to benefit on the economical growth of emerging countries. The fund accomplishes this goal basically via individual equity investments, however it may also hold collective investment instruments, if it is necessary for the efficient management of the portfolio. These can primarily be ETFs listed on the stock exchange, and open-end public investment funds. In the course of selecting the equities the Fund dedicates special attention to the compliance of individual companies with ESG (environmental, social, governance) criteria, so in addition to analyzing the financial factors, Portfolio managers also take into consideration environmental, social and governance factors during the investment decision making process. The Fund Manager seeks to build a portfolio in which the positive ESG characteristics of companies prevail, i.e. companies with high ESG scores are overrepresented in the portfolio as compared to companies with low ESG scores. The environmental criterion covers the elements where a business interacts with the environment. Environmental criteria include elements in the course of which the company comes into contact with the environment. These include for example the energy utilization, waste management, pollutant emission and/or the preservation of natural resources. Social criteria include all relations maintained by the company with its external partners, customers and internal employees. Corporate governance criteria are legal factors impacting reliable operation of a company. The Fund's main strategy is to provide broad emerging equity market exposure and to achieve performance above the emerging market index through active equity market allocation. An active strategy enables the Fund to achieve a return in excess of the benchmark. The Fund's risk exposure due to its geographical distribution is close to the benchmark. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD).

MARKET SUMMARY

In the US, the Federal Reserve did not raise its benchmark interest rate, which was in line with expectations but also left some question marks. The interest rate curve, now pricing in that the Fed will raise rates once more this year by 25 basis points, but then do nothing until the end of the year and start the rate-cutting cycle early next year. The question is why the Fed thinks it didn't have to raise rates now and will in 6 weeks. Analysts say that although the Fed communicates its intentions well, the thought process is inconsistent.

The Monetary Council of the Hungarian National Bank (MNB) acted as expected at its June rate decision meeting. The base rate remained at 13 percent, but the interest rate corridor narrowed slightly, with the overnight deposit rate remaining at 12.5 percent and the overnight lending rate falling to 18.5 percent. The base rate has been at 13 percent since September last year, and the MNB has not changed it since. However, in October last year, it introduced a one-day deposit tender at 18 percent, in response to the collapse of the forint. This rate was lowered by the Monetary Council at last month's rate-setting meeting, after it was seen that inflation had peaked and would now moderate. The May inflation figure was also positive at 21.5 percent, so the central bank was expected to cut the benchmark overnight deposit tender rate further. Inflation has begun to moderate noticeably and there is a good chance that the rate of inflation could fall to well below 10 percent by the end of the year. The forint remained stable against the euro, at 371 forints to 1 euro at the end of the month.

The Fund achieved a positive return in June and outperformed the benchmark index. The Fund was helped by the Greek overweight to Mexico, but the underweight to South Africa negatively impacted the Fund's performance as South African equities performed very well in June. Our view on Mexico remains that it could be one of the winners from deglobalisation in the Americas. At the end of the month, the Greek and Mexican markets remained overweight in the fund, while the Indian, Chinese and South Korean markets were underweight. In the second half of the month, we started to reduce equity exposure and by the end of the month the fund was at around 92% of the benchmark index.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI EM (EMERGING MARKETS) ESG
