

## INVESTMENT POLICY OF THE FUND

The aim of the Fund is to create an investment portfolio that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon while achieving the Fund's Sustainability Objectives. With a view to achieving these objectives, the Fund may invest in a variety of instruments, i.e. it holds primarily equity and bond-type instruments, while it may also invest in collective securities and enter into derivative transactions, subject in each case to the relevant investment limits. The fund does not have a geographical specification. In order to realise the investment objectives, the asset groups in the Fund's portfolio may be varied freely, without having to adhere to a predetermined risk profile.

The Fund's investment strategy is based on sustainable value creation, aiming to build an actively managed and sufficiently diverse portfolio that takes into account both sustainability criteria and the fundamentals of the assets held. The Fund's asset allocation strategy is based on the asset allocation model used by the Fund Manager, the Investment Clock, used by the Fund Manager to determine the asset mix with the best risk to return potential at a given point of the economic cycle. In addition to asset allocation, the Fund Manager aims to achieve the financial and sustainability objectives of the Fund through active stock and bond selection policies. Stock selection is based on sustainable growth, through the selection of stocks of companies able to achieve outstanding performance both financially and in terms of ESG risks, thus creating long-term shareholder value. When selecting bonds, the Fund Manager seeks to maximise the proportion of green bond issues, taking into account existing market constraints.

## MARKET SUMMARY

In the US, the Federal Reserve did not raise its benchmark interest rate, which was in line with expectations but also left some question marks. The interest rate curve, now pricing in that the Fed will raise rates once more this year by 25 basis points, but then do nothing until the end of the year and start the rate-cutting cycle early next year. The question is why the Fed thinks it didn't have to raise rates now and will in 6 weeks. Analysts say that although the Fed communicates its intentions well, the thought process is inconsistent.

The Monetary Council of the Hungarian National Bank (MNB) acted as expected at its June rate decision meeting. The base rate remained at 13 percent, but the interest rate corridor narrowed slightly, with the overnight deposit rate remaining at 12.5 percent and the overnight lending rate falling to 18.5 percent. The base rate has been at 13 percent since September last year, and the MNB has not changed it since. However, in October last year, it introduced a one-day deposit tender at 18 percent, in response to the collapse of the forint. This rate was lowered by the Monetary Council at last month's rate-setting meeting, after it was seen that inflation had peaked and would now moderate. The May inflation figure was also positive at 21.5 percent, so the central bank was expected to cut the benchmark overnight deposit tender rate further. Inflation has begun to moderate noticeably and there is a good chance that the rate of inflation could fall to well below 10 percent by the end of the year. The forint remained stable against the euro, at 371 forints to 1 euro at the end of the month.

The Fund achieved a positive return in June. Equity exposure was the main contributor to the good performance, with Greek, Polish and Hungarian positions contributing the most. The bond exposure also performed well, especially the regional positions. Within bonds, we continued to reduce Hungarian interest rate exposure and increased developed market bond exposure along with the dollar exposure. During the month we have slightly increased the equity weight which now stands at around 31%. We continue to increase the proportion of green bonds in the fund, which is now at 70%. At the end of April, the interest rate risk on bonds was 2.8 years. We further reduced the fund's foreign exchange hedge in June.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 9.5%
