

VIG Alfa Absolute Return Investment Fund

A series HUF MONTHLY report - 2023 JULY (made on: 07/31/2023)

INVESTMENT POLICY OF THE FUND

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The Fund applies special investment strategies used by hedge funds to establish its strategy. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds (treasury bonds, discounted treasury bills, bonds issued by the National Bank of Hungary, as well as low-risk bank and corporate bonds expected to bring higher yields than the state securities) Equities and other securities, indices and currencies - provided it sees the opportunity to make substantial gains – up to the maximum limit allowed by the law, which allows double leverage for the Fund. In its investment decisionmaking mechanism, the Fund considers fundamental pricing, technical and behavioral psychological factors To ensure liquidity the Fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

MARKET SUMMARY

Global growth is running below-trend this year but considering the size and extent of recent headwinds (real rate shock, monetary tightening) is holding up relatively well. Underneath this resilient global picture there continues to be a marked divergence between strong services and weak manufacturing sectors. As a result, manufacturing-intensive economies like China and Germany are struggling while more services-based ones like the United States are outperforming. We still see a disinflationary environment. While goods inflation has fallen notably, services inflation is still running high across a wide range of economies.

The Fund achieved a positive return in July. During the month, we maintained an equity weighting below 20%, which we intend to cover with advanced equity short positions in case of renewed market volatility. In 25% of the Fund, we have established a HUF weakening position, while the 25% short duration foreign currency bond portfolio is held in a HUF revaluation. Overall, the risk profile of the Fund remains low, with high liquidity as we expect higher volatility in the second half of the year, where we hope to be able to increase the Fund's risk at much better levels than currently.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 9.5%
