

VIG BondMaxx Total Return Bond Investment Fund

A series HUF MONTHLY report - 2023 JULY (made on: 07/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.

The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an "investment clock" approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

The US inflation report for June surprised to the downside. Both the headline and core indices increased 0.2% MoM, 0.1% below market expectations. Chinese GDP data for the second quarter of this year confirmed the widely anticipated slowdown, while US retail sales for June rose for a third consecutive month. ECB's Knot said that core inflation in the Eurozone has likely plateaued and that rate hikes beyond July are possible but not certain. Both the Fed and the ECB raised rates by 25bp and refrained from providing any guidance about future rate moves. The BoJ tweaked its yield-curve-control to allow for more flexibility in dealing with spikes in yields. The US economy grew at a stronger-than-expected 2.4% annualized rate in Q2 '23, while German GDP stagnated. China's top leaders pledged more policy support to stimulate the economy once again. Major central banks approaching the end of rate-hike cycles and hopes for a soft-landing supported stock markets, while credit spreads moved moderately tighter. The BoJ's decision fueled a pronounced bear-steepening across bond markets. In FX, EUR-USD fell back below 1.10.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 9%
