

VIG Emerging Europe Bond Investment Fund

A series EUR MONTHLY report - 2023 JULY (made on: 07/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

The US inflation report for June surprised to the downside. Both the headline and core indices increased 0.2% MoM, 0.1% below market expectations. Chinese GDP data for the second quarter of this year confirmed the widely anticipated slowdown, while US retail sales for June rose for a third consecutive month. ECB's Knot said that core inflation in the Eurozone has likely plateaued and that rate hikes beyond July are possible but not certain. Both the Fed and the ECB raised rates by 25bp and refrained from providing any guidance about future rate moves. The BoJ tweaked its yield-curve-control to allow for more flexibility in dealing with spikes in yields. The US economy grew at a stronger-than-expected 2.4% annualized rate in Q2 '23, while German GDP stagnated. China's top leaders pledged more policy support to stimulate the economy once again. Major central banks approaching the end of rate-hike cycles and hopes for a soft-landing supported stock markets, while credit spreads moved moderately tighter. The BoJ's decision fueled a pronounced bear-steepening across bond markets. In FX, EUR-USD fell back below 1.10.
