

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, averagely low-risk form of investment, while providing investors with higher returns over the medium term than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) on behalf of the Hungarian State, and bonds issued by the National Bank of Hungary (MNB). The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated in HUF. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

MARKET SUMMARY

In July, disinflation continued in Hungary, year on year inflation rate decreased to 17.6%. This is the first time since August 2022 that inflation has been below 20% in Hungary. On the rate setting meeting in July, the Monetary Council cut the ON deposit rate by the expected 100 basis points, bringing it to 15%. Communication remained hawkish, in case of favorable changes in the risk assessment the acceleration of the pace of rate cuts are out of the cards, but in case of new shocks, it is possible that they will slow down or even pause the rate cut cycle. During the month, the yield curve moved slightly higher. Yields on the 3-year maturity increased by 26 basis points, and on the 10-year maturity, they rose by 39 basis points, while the belly of the curve remained relatively unchanged. The valuation of the domestic papers versus regional peers improved during the month. The technical picture also improved, and both retail and institutional issuances are progressing according to plans. The global sentiment is supportive, as developed market central banks are approaching to the end of their rate hike cycles.
