

VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2023 JULY (made on: 07/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

Aegon Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Moneymarket Fund is capable of fluctuation. Aegon Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In July, disinflation continued in Hungary, year on year inflation rate decreased to 17.6%. This is the first time since August 2022 that inflation has been below 20% in Hungary. On the rate setting meeting in July, the Monetary Council cut the ON deposit rate by the expected 100 basis points, bringing it to 15%. Communication remained hawkish, in case of favorable changes in the risk assessment the acceleration of the pace of rate cuts are out of the cards, but in case of new shocks, it is possible that they will slow down or even pause the rate cut cycle. During the month, the demand for short-term papers somewhat normalized, with the average yield of 3-month T-bills decreasing to 10.01% by the end of the month, the 6-month T-bill auction yielding 9.97%, and the annual T-bill auction offering papers at an average yield of 10.2%. During the month, we didn't make significant changes to the composition of the fund, we still prefer holding longer-term papers (close to 1 year).
