

# VIG Opportunity Developed Markets Equity Investment Fund

A series HUF MONTHLY report - 2023 JULY (made on: 07/31/2023)

## INVESTMENT POLICY OF THE FUND

The Fund aims to profit from the returns on global equity market investments through stock prices and dividend income. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of shares of foreign companies issued through public offerings, but the Fund may also invest in shares issued by Hungarian companies. The proportion of shares that can be held in the Fund at any given time may reach the prevailing legal maximum. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

## MARKET SUMMARY

Global growth is running below-trend this year but considering the size and extent of recent headwinds (real rate shock, monetary tightening) is holding up relatively well. Underneath this resilient global picture there continues to be a marked divergence between strong services and weak manufacturing sectors. As a result, manufacturing-intensive economies like China and Germany are struggling while more services-based ones like the United States are outperforming. We still see a disinflationary environment. While goods inflation has fallen notably, services inflation is still running high across a wide range of economies.

The fund's return was in line with the benchmark index in July. Due to the macroeconomic numbers that came out in July, we keep the fund underweight against the benchmark index and also keeping the short Tesla position, as the quarterly report continued to show shrinking profit margins. Due to the government decree, we keep the Hungarian Treasury bill position unchanged, which negatively impacts the fund's performance, this was the main reason why the fund's return in line with the benchmark index.
