## ■ VIG Smart Money Fund of Funds

A series HUF

MONTHLY report - 2023 JULY (made on: 07/31/2023)

## INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by Aegon Magyarország Befektetési Alapkezelő Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

#### MARKET SUMMARY

Global growth is running below-trend this year but considering the size and extent of recent headwinds (real rate shock, monetary tightening) is holding up relatively well. Underneath this resilient global picture there continues to be a marked divergence between strong services and weak manufacturing sectors. As a result, manufacturing-intensive economies like China and Germany are struggling while more services-based ones like the United States are outperforming. We still see a disinflationary environment. While goods inflation has fallen notably, services inflation is still running high across a wide range of economies.

The Fund ended the month of July with a positive return. Most equity markets rose in local currency terms, and commodity markets, which have underperformed so far this year, found their strength, with oil prices also rising significantly. Exposures to money markets in forint closed in positive territory in line with the yield environment, while funds holding longer-dated Hungarian government bonds closed sideways. The forint had a volatile month, recovering from its initial weakness, but then weakened again at the end of the month, weakening significantly against both developed and emerging market currencies last month. In July, the absolute return funds held in the Smart fund delivered positive returns without exception, benefiting from the divergent performance of the asset classes.
