

VIG Developed Markets Government Bond Investment Fund

A series HUF MONTHLY report - 2023 AUGUST (made on: 08/31/2023)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

In the Eurozone, headline inflation was unchanged at 5.3% YoY last month, while core inflation slowed down by 0.2 percentage points to 5.3% YoY. This makes the ECB's upcoming decision difficult to forecast. In the United States, JOLTS job openings surprised to the downside in July, the core PCE inflation stabilized at 0.2% month-over-month and personal spending further increased. In China, the PMIs for August indicated broad-based weakness in economic activity, with early signs of stabilization in the manufacturing sector. Weaker-than-expected US labour market data boosted USTs, taking the 10Y yield back to the 4% area, and weighed on the USD, which lost some recent strength. Recovery in global equity prices continued, although with slow momentum. European corporate credit was mixed, non-financial investment-grade seniors drifted gradually wider while bank spreads were almost flat. We switched to Romanian government bonds from Hungarian ones, opened positions in the Czech unit of the Raiffeisen Bank and invested a small amount of cash in the US and French treasury bills.
