

# VIG Opportunity Developed Markets Equity Investment Fund

A series HUF MONTHLY report - 2023 AUGUST (made on: 08/31/2023)

## INVESTMENT POLICY OF THE FUND

The Fund aims to profit from the returns on global equity market investments through stock prices and dividend income. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of shares of foreign companies issued through public offerings, but the Fund may also invest in shares issued by Hungarian companies. The proportion of shares that can be held in the Fund at any given time may reach the prevailing legal maximum. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

## MARKET SUMMARY

Data from early August show that US labor market demand has already slowed in a number of sectors, with wage growth remaining strong. However, the macro data so far show no signs of deterioration, with the Atlanta Fed raising its latest third quarter GDP growth estimate from 5 to 5.8 percent on good housing and industrial production data, which has also pushed yields higher, with the 10-year US Treasury rising to levels not seen since 2007. The FOMC's latest meeting suggests that monetary policymakers still see "significant upside risks to inflation" and may therefore consider further rate hikes necessary. FED Chair Jerome Powell's Jackson Hole speech at the end of the month seemed austere, but statements such as "caution may be the way forward" indicate that the Fed will not raise rates unless the inflation trend worsens, leaving the option of raising rates for a worse scenario. In Hungary, the MNB continued to cut interest rates. The policy rate is now at 14% and could converge to the base rate in September. Thereafter, the base rate may also be cut, but this will require a continuation of decline in inflation. It is noteworthy that, in contrast to previous rate cuts, the forint has not weakened against the euro, but has risen to a one-month high of 379 forints to 1 euro by the end of the month.

The fund achieved a negative return in August, but outperformed the reference index. During the month, we tried to take advantage of the violent movement of the indices, so we traded more actively than usual. During the month, we bought back the Tesla shorts and opened long positions near the bottom. After the stock rose more than 20%, we sold it. We also bought NVDA shares before the quarterly report, which we also sold at higher levels. In the middle of the month, we bought 2 precious metal mining shares, we realized a profit in one of them before the end of the month, and we kept the other. Due to the government decree, we are keeping the Hungarian Treasury bill position unchanged, which has a negative effect on the fund's performance.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Citibank Europe plc Magyarországi Fióktelepe
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI World Net Total Return USD Index
