

# VIG Ozon Annual Capital Protected Investment Fund

A series HUF MONTHLY report - 2023 SEPTEMBER (made on: 09/30/2023)

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve a higher return than that of short-term bonds by investing in bonds of low volatility and limited-risk profile issued or guaranteed by certain specified states, quasi-sovereign corporations, national banks or supranational institutions. The Fund invests most of its available assets in low-risk instruments, i.e. bonds issued or guaranteed by the Hungarian state or states with a credit rating at least equal to or better than the latter's latest rating (or by their debt management agencies), quasi-sovereign companies, national banks or supranational institutions. The Fund may hold bank deposits, or cash, and enter into repo and reverse repo transactions. The maximum interest rate risk with respect to the Fund as a whole (i.e. its duration) is 3 years, while the weighted average maturity of the individual securities is a maximum of 10 years. For bonds denominated in currencies other than Hungarian forint, the asset manager seeks to fully hedge the foreign exchange risk, and may only deviate from this at the expense of risky assets (i.e. in the case of foreign exchange under/over-hedging). The Fund uses a small portion of its available assets to purchase risky instruments – domestic and foreign equities, equity indexes, higher risk bonds, foreign exchange, commodity market products and collective investment securities on the spot and futures markets. The Fund may enter into both long and short trades. Based on the approach followed when purchasing risky assets, the Fund is an absolute return fund: it selects investment options with the best possible expected return/risk ratio from the options available to it on the domestic and international money and capital markets. There is no possibility for making individual investor decisions in respect of the Fund.

## MARKET SUMMARY
