

INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty. Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In September, Polish bonds showed mixed performance: the short and mid part of the yield curve moved lower, yields on the three-year maturity decreased by 23 basis points, and on the five-year maturity by 13 basis points. However, in the 10-year segment, there was a 30 basis point yield increase in September. At the beginning of the month, the Polish central bank surprised the market with a much larger-than-expected 75 basis point interest rate cut, bringing the key rate to 6%. Market expectations had projected a maximum 25 basis points cut but rather waited for no change. Investors priced in a policy error as along with falling short term yields, long term yields even increased, resulting in a much steeper Polish yield curve. Parliamentary elections are scheduled for mid-October, so further interest rate cuts are expected at the beginning of October, most probably by a smaller size (rather 25bps than 50bps), but neither 75bps nor 0bps can't be ruled out. Preliminary data indicate that in September, year-on-year inflation in Poland decreased from 10.1% in August to 8.2%. Therefore, inflation is currently at levels not seen since October 2021, primarily due to lower fuel and food prices and administrative measures implemented by the government. Headline inflation would allow again a bigger cut in October in the short run, however the significant depreciation of PLN may limit the size of the next cut. Uncertainty is much higher, than usual. According to Bloomberg's September survey, the Polish economy is expected to grow by 0.5% this year and by 2.7% next year. The Purchasing Managers' Index (PMI) rose to 43.9 in September from the previous month's 43.1, slightly above the market expectation of 43.7. The index is still below the 50 threshold, indicating a contraction, as both output and new orders continued to decline due to the uncertain economic environment and high inflation. In August, industrial production recorded a 2% decrease, which was below the market expectation of -1.7%. Regarding the state budget, the government generated a deficit of 408.65 million PLN in the seventh month, bringing the rolling 12-month budget deficit to 1.84% of GDP.
