

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by Aegon Magyarország Befektetési Alapkezelő Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

In the US, at a press conference after the US Federal Reserve's September meeting, the Fed chairman said that he believes US interest rates will remain higher for longer than market participants had previously thought, which could mean that despite the fall in inflation, based on the macroeconomic numbers, the Fed is not willing to cut rates quickly. Also, Fed Chairman Jerome Powell does not seem to want to declare victory over inflation too soon, after his ill-fated "inflation is only temporary" statement two years ago, which means that he is leaning towards tightening, especially while economic indicators are still strong. Powell has also talked about soft-landing, but contrary to market expectations, this is not the Fed's baseline scenario. Real wages in the US are rising again, which is boosting economic activity, and the combined effect of these could lift the inflation trajectory in the coming months.

In Hungary, the MNB has continued to cut interest rates and after a long period, the base rate and the policy rate are the same. The base rate is now only 13%, which raises the question of how the forint will react to this. Although 13% is the highest in the region, the political risk premium makes it uncertain that the forint can remain stable. The MNB expects domestic inflation and core inflation to continue to fall at a rapid pace in the coming months. As the pace of disinflation continues to accelerate, inflation is expected to ease into the single-digit range in the autumn.

The fund delivered a positive return in September, despite global bond and equity markets falling last month. The performance was helped by the funds' unhedged currency positions and short bond exposures, with the Alpha, Marathon and Panorama funds all adding to the monthly performance. Only the investments in the MoneyMaxx fund had a negative impact on performance after emerging market assets performed poorly.
