

VIG BondMaxx Total Return Bond Investment Fund

PI series PLN MONTHLY report - 2023 OCTOBER (made on: 10/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.

The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an "investment clock" approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Last month, the war between Israel and Hamas triggered fresh geopolitical uncertainty and modestly higher energy prices. The US September inflation report showed weaker progress on disinflation, with services inflation picking up. Several Fed officials emphasised the central bank could proceed carefully and that a rise in long-term yields may mean less need to raise rates. The ECB left interest rates unchanged, as expected by the majority of the market, and the tone was slightly less hawkish. Both the Fed and the BoE left interest rates unchanged and retained a tightening bias, although the odds of further hikes appear to be waning. China's PMIs resumed weakening from low levels, signalling that growth remains under pressure. The BoJ tweaked its yield-curve-control framework, refraining from making any substantial changes. Weak growth and easing inflation in the Eurozone, together with a moderately dovish FOMC meeting outcome, drove government-bond yields down; the 10Y UST yield fell to 4.65%, while the 10Y Bund yield dropped to 2.70%. Equities were well supported in this environment and are set to close the month with gains. Credit spreads tightened across the board. EUR-USD steadied above 1.06, while USD-JPY fell back towards 150, after having reached a peak of nearly 152. The fund still keeps its Ukrainian exposure, and waits for improvement in the Ukrainian-Russia war; we added in French long-term government bonds, further intention to raise exposure to the core rates markets while decreasing Hungarian risk stays in place.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 3.9%
ISIN code:	HU0000727391
