

VIG Developed Market Short Term Bond Investment Fund

EI series EUR MONTHLY report - 2023 OCTOBER (made on: 10/31/2023)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

Last month, the war between Israel and Hamas triggered fresh geopolitical uncertainty and modestly higher energy prices. The US September inflation report showed weaker progress on disinflation, with services inflation picking up. Several Fed officials emphasised the central bank could proceed carefully and that a rise in long-term yields may mean less need to raise rates. The ECB left interest rates unchanged, as expected by the majority of the market, and the tone was slightly less hawkish. Both the Fed and the BoE left interest rates unchanged and retained a tightening bias, although the odds of further hikes appear to be waning. China's PMIs resumed weakening from low levels, signalling that growth remains under pressure. The BoJ tweaked its yield-curve-control framework, refraining from making any substantial changes. Weak growth and easing inflation in the Eurozone, together with a moderately dovish FOMC meeting outcome, drove government-bond yields down; the 10Y UST yield fell to 4.65%, while the 10Y Bund yield dropped to 2.70%. Equities were well supported in this environment and are set to close the month with gains. Credit spreads tightened across the board. EUR-USD steadied above 1.06, while USD-JPY fell back towards 150, after having reached a peak of nearly 152. Initial allocation of the fund remained mostly unchanged last month.
