

VIG Developed Markets Government Bond Investment Fund

A series HUF MONTHLY report - 2023 OCTOBER (made on: 10/31/2023)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

Last month, the war between Israel and Hamas triggered fresh geopolitical uncertainty and modestly higher energy prices. The US September inflation report showed weaker progress on disinflation, with services inflation picking up. Several Fed officials emphasised the central bank could proceed carefully and that a rise in long-term yields may mean less need to raise rates. The ECB left interest rates unchanged, as expected by the majority of the market, and the tone was slightly less hawkish. Both the Fed and the BoE left interest rates unchanged and retained a tightening bias, although the odds of further hikes appear to be waning. China's PMIs resumed weakening from low levels, signalling that growth remains under pressure. The BoJ tweaked its yield-curve-control framework, refraining from making any substantial changes. Weak growth and easing inflation in the Eurozone, together with a moderately dovish FOMC meeting outcome, drove government-bond yields down; the 10Y UST yield fell to 4.65%, while the 10Y Bund yield dropped to 2.70%. Equities were well supported in this environment and are set to close the month with gains. Credit spreads tightened across the board. EUR-USD steadied above 1.06, while USD-JPY fell back towards 150, after having reached a peak of nearly 152. We didn't make meaningful changes to the fund's composition throughout last month.
