

# VIG Hungarian Bond Investment Fund

A series HUF MONTHLY report - 2023 OCTOBER (made on: 10/31/2023)

## INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, averagely low-risk form of investment, while providing investors with higher returns over the medium term than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) on behalf of the Hungarian State, and bonds issued by the National Bank of Hungary (MNB). The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated in HUF. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

## MARKET SUMMARY

In October, disinflation continued in Hungary, inflation fell below 10% again for the first time in a while, the year-over-year increase was 9,9%. During the month, fuel prices continued to decrease, which had a positive impact on disinflation. During the October rate setting meeting, the Monetary Council surprised the market by reducing the base interest rate by 75 basis points, bringing the benchmark rate to 12.25%. The Monetary Council considered several scenarios when making the decision. Strong disinflation allowed for further cuts in the base rate, but due to increasing external risks, it was justified to slow down the pace of rate cuts. The easing cycle can remain data-driven, and a more cautious approach is justified, because the disinflation has to continue in 2024 as well. Issuance is mostly progressing as planned, but the fiscal situation doesn't look too good. During the month, 10 year bond yields moved somewhat higher, but 3 and 5 year yields closed the month 13 and 5 basis points lower, respectively. Due to the deterioration of sentiment in the core markets, we became slightly cautious, but the collapsing economic activity makes us still more positive about the asset class.
