

VIG Hungarian Money Market Investment Fund

I series HUF MONTHLY report - 2023 OCTOBER (made on: 10/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

Aegon Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Moneymarket Fund is capable of fluctuation. Aegon Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

In October, disinflation continued in Hungary, inflation fell below 10% again for the first time in a while, the year-over-year increase was 9,9%. During the month, fuel prices continued to decrease, which had a positive impact on disinflation. During the October rate setting meeting, the Monetary Council surprised the market by reducing the base interest rate by 75 basis points, bringing the benchmark rate to 12.25%. The Monetary Council considered several scenarios when making the decision. Strong disinflation allowed for further cuts in the base rate, but due to increasing external risks, it was justified to slow down the pace of rate cuts. The easing cycle can remain data-driven, and a more cautious approach is justified, because the disinflation has to continue in 2024 as well. Until the middle of the month, discount bill yields continued to decline, with a slight normalization towards the end of the month. Given strong disinflation and the rate cut cycle, we continue to expect short-term yields to decrease, so we prioritize keeping the duration higher going forward.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000718135
Start:	12/01/2016
