

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In October, the Hamas-Israel war caused oil prices to rise 10%, but as the chances of the war not turning into a wider Middle East crisis diminished, oil prices fell back to pre-conflict levels. The US Federal Reserve is still communicating a very tight monetary policy, but markets are becoming immune because the accepted view is that a recession will come sooner or later and then the Fed is expected to cut interest rates. Currently, bond markets are pricing in the first rate cut in May by next year, with an 80 basis point cut priced in for 2024. The Hungarian National Bank has decided to cut its base rate by 75 basis points in October, slowing from the previous 100 basis point rate cut. The decision came as some surprise as the consensus had expected only a 50 basis point cut. In the statement released, the MNB indicated that strong disinflation and the reduction in the country's vulnerabilities allow for a continuation of the normalization of monetary conditions by lowering the base rate, while rising external risks justify maintaining a cautious approach and continuing to cut interest rates at a slower pace than before. Vice-President Barnabas Virág said that the decision would be taken in a step-by-step, cautious and data-driven manner, depending on the factors affecting the inflation path and the evolution of the risk environment. The forint strengthened against the euro throughout October, but weakened slightly after the rate decision meeting.

In October, Tempo funds did not have a strong month, as they posted an overall negative performance. The tactical decision was made to pull the overall weighting of the equity class in the funds back to strategic levels by increasing developed market exposure above the long-term target level, while continuing to underweight emerging market equities. We expect that developed markets could experience a very short-term bounce this month. To hedge this, we have reduced domestic bond exposure to strategic target levels, as well as reducing some total return exposure and cash holdings. In the TempoMaxx fund, we increased the weighting in developed equity markets to bring total equity exposure closer to the strategic target level by cutting back the domestic bond weighting.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000714076
Start:	10/27/2014
Currency:	HUF
Net Asset Value of the whole Fund:	1,218,308,388 HUF
Net Asset Value of A series:	1,216,952,873 HUF
Net Asset Value per unit:	1.150930 HUF
