

VIG Developed Market Short Term Bond Investment Fund

E series EUR MONTHLY report - 2023 NOVEMBER (made on: 11/30/2023)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them.

The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund.

No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

In November, Eurozone headline and core inflation eased further, to 2.4% and 3.6%, respectively. The President of the European Central Bank, Christine Lagarde said that the central bank might rethink its pandemic purchase programme (PEPP) strategy, which currently foresees full reinvestment until the end of the next year. In the US, core Personal Consumption Expenditure (PCE) inflation slipped to 3.5% YoY in October (below the level of the Fed expectations for the end of the year), while the Beige Book (summary of information on current economic conditions through reports and interviews summarized by the Fed) indicated economic activity had slowed and is expected to slow thereafter. US Congress passed a stopgap spending bill until mid-January. German industrial production contracted in September for a fifth consecutive month. The UK economy stagnated in Q3. In China, inflation fell slightly below zero, reflecting weak domestic demand amid weak exports. Brent oil prices briefly fell below \$80/bbl on global demand fears, reversed some of the losses later in the month on OPEC rumours of further production cuts while the outlook looks gloomy yet. Equity markets moved sideways, while EGB and UST curves bull steepened, following lower-than-expected inflation. Corporate credit spreads tightened slightly. EUR-USD fell back below 1.09 after hitting 1.10, also reversing the initial rally in CEE FX. We opened positions in French government papers and bought EIB bonds as well as added to the Italian and Spanish positions.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
