

VIG BondMaxx Total Return Bond Investment Fund

P series PLN MONTHLY report - 2023 DECEMBER (made on: 12/31/2023)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.

The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an "investment clock" approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Last month, in the US, November JOLTS job openings was reported weaker of the market consensus, while the ISM services index moved to a slight increase in activity in November. In Germany, both factory orders and industrial production contracted more than forecasted in October and Italy's services PMI for November pointed to further weakness. The last month of 2023 was mostly about important central bank meetings. The message from the Fed's dot plot and Mr. Powell was unequivocal dovish, while the ECB and the Bank of England did not support the aggressive rate cut expectations priced in by markets. The Eurozone composite PMI disappointed, moving back further into contractionary territory. The bull run in the government bond market continued, while the stock-market rally started to fade, limiting this month's gains, despite stayed at elevated levels. In FX, the USD weakened further across the board, with EUR-USD reaching the 1.10 area. The fund still keeps its Ukrainian exposure, and waits for improvement in the Ukrainian-Russia war; no significant changes to the fund's composition were made, except for adding to the Italian government bonds positions, further intention to raise exposure to the core rates markets while decreasing Hungarian risk stays in place.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
