

VIG Developed Market Short Term Bond Investment Fund

EI series EUR MONTHLY report - 2023 DECEMBER (made on: 12/31/2023)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

Last month, in the US, November JOLTS job openings was reported weaker of the market consensus, while the ISM services index moved to a slight increase in activity in November. In Germany, both factory orders and industrial production contracted more than forecasted in October and Italy's services PMI for November pointed to further weakness. The last month of 2023 was mostly about important central bank meetings. The message from the Fed's dot plot and Mr. Powell was unequivocal dovish, while the ECB and the Bank of England did not support the aggressive rate cut expectations priced in by markets. The Eurozone composite PMI disappointed, moving back further into contractionary territory. The bull run in the government bond market continued, while the stock-market rally started to fade, limiting this month's gains, despite stayed at elevated levels. In FX, the USD weakened further across the board, with EUR-USD reaching the 1.10 area. We opened positions in Lithuanian government papers as well as added to the French, Italian, Portuguese and Spanish positions.
