

VIG Maraton ESG Multi Asset Investment Fund

A series HUF MONTHLY report - 2023 DECEMBER (made on: 12/31/2023)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to create an investment portfolio that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon while achieving the Fund's Sustainability Objectives. With a view to achieving these objectives, the Fund may invest in a variety of instruments, i.e. it holds primarily equity and bond-type instruments, while it may also invest in collective securities and enter into derivative transactions, subject in each case to the relevant investment limits. The fund does not have a geographical specification. In order to realise the investment objectives, the asset groups in the Fund's portfolio may be varied freely, without having to adhere to a predetermined risk profile.

The Fund's investment strategy is based on sustainable value creation, aiming to build an actively managed and sufficiently diverse portfolio that takes into account both sustainability criteria and the fundamentals of the assets held. The Fund's asset allocation strategy is based on the asset allocation model used by the Fund Manager, the Investment Clock, used by the Fund Manager to determine the asset mix with the best risk to return potential at a given point of the economic cycle. In addition to asset allocation, the Fund Manager aims to achieve the financial and sustainability objectives of the Fund through active stock and bond selection policies. Stock selection is based on sustainable growth, through the selection of stocks of companies able to achieve outstanding performance both financially and in terms of ESG risks, thus creating long-term shareholder value. When selecting bonds, the Fund Manager seeks to maximise the proportion of green bond issues, taking into account existing market constraints.

MARKET SUMMARY

The main event in December was the central bank's interest rate decision meeting. It is now accepted view that inflation has been contained and the year-on-year figure has been falling for months, but the big question was how the Fed would respond. At the post-meeting press briefing, investors got an answer to that question, wrapped in as a Christmas present. Based on Fed Chairman Jerome Powell's statements, investors can take it for granted that the cycle of rate hikes is over and the higher-for-longer principle on interest rates is also over. While the Chairman hinted that interest rate policy will continue to be determined by macro data, investors read between the lines that not only will there be no more rate hikes, but that there will be rate cuts in 2024. As a result, market participants have started to raise their target rates for next year. There are, of course, analysts who believe that early rate cuts are a throwback to the 1970s, when the Fed started cutting rates early and inflation started to rise again. The Hungarian National Bank cut its base rate by another 75 basis points to 10.75%, and inflation also fell further in November, now at 7.9%, and according to the Hungarian Central Statistical Office, it could fall below 7% in December. The only change in the MNB's communication was that they no longer consider it out of the question that they could cut rates by as much as 100 basis points next time. Vice President Barnabas Virág said that the rate cut would become data-dependent and that if justified, they would not rule out cutting rates by more than 75 basis points. Meanwhile, the forint remained relatively stable against the euro, it did not move significantly from around 380 level.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 9.5%
