

INVESTMENT POLICY OF THE FUND

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio.

MARKET SUMMARY

The main event in December was the central bank's interest rate decision meeting. It is now accepted view that inflation has been contained and the year-on-year figure has been falling for months, but the big question was how the Fed would respond. At the post-meeting press briefing, investors got an answer to that question, wrapped in as a Christmas present. Based on Fed Chairman Jerome Powell's statements, investors can take it for granted that the cycle of rate hikes is over and the higher-for-longer principle on interest rates is also over. While the Chairman hinted that interest rate policy will continue to be determined by macro data, investors read between the lines that not only will there be no more rate hikes, but that there will be rate cuts in 2024. As a result, market participants have started to raise their target rates for next year. There are, of course, analysts who believe that early rate cuts are a throwback to the 1970s, when the Fed started cutting rates early and inflation started to rise again. The Hungarian National Bank cut its base rate by another 75 basis points to 10.75%, and inflation also fell further in November, now at 7.9%, and according to the Hungarian Central Statistical Office, it could fall below 7% in December. The only change in the MNB's communication was that they no longer consider it out of the question that they could cut rates by as much as 100 basis points next time. Vice President Barnabas Virág said that the rate cut would become data-dependent and that if justified, they would not rule out cutting rates by more than 75 basis points. Meanwhile, the forint remained relatively stable against the euro, it did not move significantly from around 380 level.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI AC World Daily Total Return Net USD Index
