# ■ VIG Premium Dynamic Sub-fund of Funds

HUF

MONTHLY report - 2023 DECEMBER (made on: 12/31/2023)

#### INVESTMENT POLICY OF THE FUND

#### MARKET SUMMARY

The main event in December was the central bank's interest rate decision meeting. It is now accepted view that inflation has been contained and the year-on-year figure has been falling for months, but the big question was how the Fed would respond. At the post-meeting press briefing, investors got an answer to that question, wrapped in as a Christmas present. Based on Fed Chairman Jerome Powell's statements, investors can take it for granted that the cycle of rate hikes is over and the higher-for-longer principle on interest rates is also over. While the Chairman hinted that interest rate policy will continue to be determined by macro data, investors read between the lines that not only will there be no more rate hikes, but that there will be rate cuts in 2024. As a result, market participants have started to raise their target rates for next year. There are, of course, analysts who believe that early rate cuts are a throwback to the 1970s, when the Fed started cutting rates early and inflation started to rise again. The Hungarian National Bank cut its base rate by another 75 basis points to 10.75%, and inflation also fell further in November, now at 7.9%, and according to the Hungarian Central Statistical Office, it could fall below 7% in December. The only change in the MNB's communication was that they no longer consider it out of the question that they could cut rates by as much as 100 basis points next time. Vice President Barnabas Virág said that the rate cut would become data-dependent and that if justified, they would not rule out cutting rates by more than 75 basis points. Meanwhile, the forint remained relatively stable against the euro, it did not move significantly from around 380 level.

In the last month of the year, the Premium funds had a positive performance. The tactical decision to maintain the overall weighting of the equity class in the funds remains slightly above neutral, but we have reduced the pure European equity exposure slightly in favor of US market exposure, so the weighting in developed and central European equity markets is still slightly above the long-term target level, while emerging market equities are still underweight. Equity market returns also performed well in the last month of the year, so a slight equity market overweight proved to be a good decision. We have kept our commodity exposure at strategic levels.
