

VIG Developed Markets Government Bond Investment Fund

A series HUF MONTHLY report - 2024 JANUARY (made on: 01/31/2024)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

The ECB didn't make changes into its monetary policy last month. ECB President Lagarde stressed that the first rate cut to be made in the summer but left the door open to an early start to the easing cycle if the data supports the decision. The Eurozone composite PMI for January rose a tad but remained in contractionary territory. In the US, the economy expanded at a strong 3.3% YoY pace in Q4 '23, driven by personal consumption. Later in the month, the Fed also left its monetary policy unchanged, dropping its tightening bias and shifting to a neutral stance. The BoE made a similar move. All three central banks signalled that rate cuts are coming, but probably later than markets expect. In the US, the Employment Cost Index, the Fed's preferred measure of wage growth, pointed to easing wage pressures, while JOLTS job openings rose in December. EU GDP stagnated in the last quarter of 2023, whereas inflation decelerated slightly less than expected. UST and Bund yields fell 10-20bp due to concerns about US regional banks. Huge supply in the euro area was absorbed with very limited pressure on spreads. The January equity rally came to a halt. EUR-USD rebounded towards 1.09. The HUF reversed its losses as the NBH only cut by 75bp, while easing political risks helped the PLN. We didn't make meaningful changes in the fund's composition amid being positioned long core government bonds.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary 80% Bloomberg Global Treasury Majors ex Japan Total Return Index Unhedged USD + 20% ZMAX Index
Benchmark composition:
